	739-1000 RPM	867-1173 RPM	994-1345 RPM	1079-1460 RPM	1164-1575 RPM

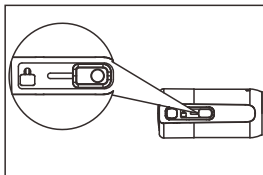

Tips

- Install beaters or hooks into main engine

Note: Do not install the hooks in wrong holes.

- Make sure the speed button at "0" before plug on

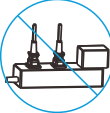

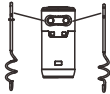

It should be allowed to cool down for 30 seconds after operated for 3 minutes

Operation

- Collect all your ingredients together before starting. Choose a mixing bowl that has plenty of room for the mixture.
- Add the first ingredients to the mixing bowl. Set the Off/Speed switch to '0' (off).
- Plug the power cable into a mains outlet.
- Holding the mixer by the handle, place the beaters or dough hooks into the mixture and gradually increase the mixing speed in the range 1 to 5 until you reach the speed you want.
- Move the beaters around a little in the mixture to help it circulate. Keep the beaters immersed in the mixture at all times to avoid splashing the mixture from the spinning beaters.
- If you need to add ingredients or redistribute the mixture in the bowl, switch off the mixer first.

Precaution

PRECAUTION
